Kelas : A

Buatkan kode yang menjalankan perkalian matrix untuk array 3 dimensi

KODE PROGRAM

```
# Program Perkalian Matriks Array 3 Dimensi

A = [
    [[1, 2],
     [3, 4]],

    [[5, 6],
     [7, 8]]
]

B = [
    [[1, 0],
     [0, 1]],

    [[2, 1],
     [1, 2]]
]
```

```
# Perkalian matriks
[]

i in range(len(A)):
hasil = []
for j in range(len(A[i])):
    baris = []
    for k in range(len(B[i][j])):
        jumlah = 0
        for l in range(len(A[i][j])):
            jumlah += A[i][j][l] * B[i][l][k]
            baris.append(jumlah)
            hasil.append(baris)
            C.append(hasil)
Print("Array A:")
Print(A)

Print("\nArray B:")
Print(B)

Print("\nHasil Perkalian A x B:")
Print(C)
```

HASIL OUTPUT NYA
